## EDUCATION

### DARUNSIKKHALAI SCIENCE SCHOOL

GPAX : 3.61

2019 - 2021

### KING MONGKUT'S UNIVERSITY OF TECHNOLOGY THONBURI

GPAX : 3.23

2022 - Present

## MY GOALS

- Study the properties of well design and functional front-end development.
- Learn how the organization applies front-end development in their work.
- Learn how front-end and back-end development integrate as a project

# SUPANUT WONGTANOM

## ABOUT ME

Hello, my name is Supanut Wongtanom. You can call me "Tong." I am studying in the computer engineering department in the third year of the international program at KMUTT. I am interested in front-end development. I mainly focus on front-end development, but I have recently found back-end development interesting. Consequently, I am currently studying it. Finally, I hope that my skills and experiences are useful as an intern.

## PROJECTS AND ACHIEVEMENTS

### PORTFOLIO WEBSITE

- A website display my profile, education, and achievements
- Implement my own portfolio website developed by ReactJS and decorated by Tailwind CSS framework

### CLONED POKEDEX WEB APPLICATION

- A web application which display list of pokemon called from PokeAPI with search and favourite functions
- Implement the web application developed by ReactJS and decorated by SCSS framework
- Implement typescript for data type management

### WECOOKED (FRONT-END)

- A platform of online-cooking videos and workshops with payment system
- Implement front-end with next.js and decorated by TailwindCSS
- Using PostgreSQL for database design
- Create backend service with prisma

## AVAILABLE DATE FOR INTERNSHIP

- 06/02/2025 - 08/01/2025
